

Chippewa MAPS 2020

Needs assessments were completed at all four of our primary district facilities, which included all areas of the physical structures and surrounding sites. Usable life of exterior, interior, safety and site conditions were evaluated. The study outlines a 20-year projection of improvements/updates/upgrades the district will need to plan for within the time line illustrated here.

- 1-3 YEARS**
\$34.4 Million
- 4-10 YEARS**
\$14.0 Million
- 11-20 YEARS**
\$15.0 Million

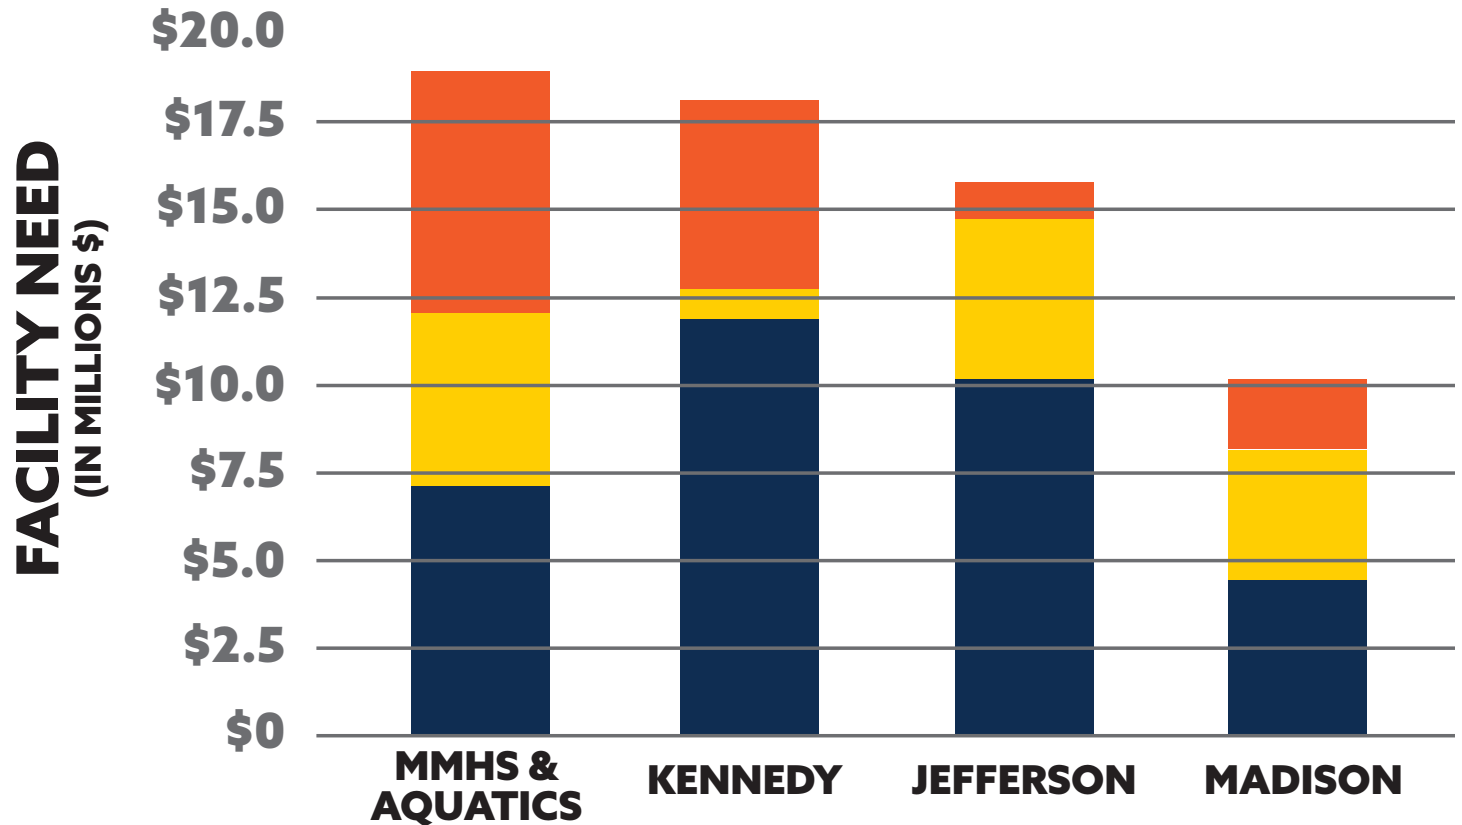

Evaluating the Last 20 Years.
Considering the Next 20.

FACILITY NEEDS ASSESSMENT

Understanding our facilities and their projected capital needs over the next 20 years
providing facts, figures, & transparency

Based on 2018 facilities needs assessment

conducted by Tower Pinkster and The Christman Company

The scope of this outline clearly demands a strategy that will reach beyond projected maintenance needs. Sources of funding, enrollment projections, usable life of assets, adapted reuse of existing space, community collaborations, and more will need to be considered when addressing a long-term solution to meet our district needs.

These do NOT include the yearly maintenance costs associated with the student facilities in the district.
