

July 19, 2022

Dear Parent or Guardian:

The Manistee Area Public School's Integrated Pest Management contractor EnviroSafe, Inc. and our staff have been working to eliminate a pest concern (wasps) at your child's school. Given the nature and location of this pest they felt it was warranted to apply a pesticide to try to resolve this concern.

A controlled pesticide application, using a product approved by the EPA, was applied. The application was done by technicians who are State Licensed and trained in the use of pesticides. The application was deemed an emergency, and that is why notification is being given after the application. The treatment is described below:

School: High School

Date of application: July 19, 2022

Area treated: Door 16

Description of treatment: Alpine dust. This was applied in areas that are not accessible to the students.

If you have any questions or concerns please feel free to contact the District's Business Office at 723-3521. If you would like more information on pesticides you may call the National Pesticide Information Center at (800) 858-7378 or the Michigan Department of Agriculture and Rural Development (800) 292-3939. Information may also be found on the web at www.npic.orst.edu

Sincerely,

Howard Vaas
Business Manager

Dear Parent or Guardian:

The Manistee Area Public School's Integrated Pest Management contractor EnviroSafe, Inc. and our staff have been working to eliminate a pest concern (yellow jackets) at your child's school. Given the nature and location of this pest they felt it was warranted to apply a pesticide to try to resolve this concern.

A controlled pesticide application, using a product approved by the EPA, was applied. The application was done by technicians who are State Licensed and trained in the use of pesticides. The application was deemed an emergency, and that is why notification is being given after the application. The treatment is described below:

School: Madison

Date of application: July 19, 2022

Area treated: Door 17

Description of treatment: Alpine dust. This was applied in areas that are not accessible to the students.

If you have any questions or concerns please feel free to contact the District's Business Office at 723-3521. If you would like more information on pesticides you may call the National Pesticide Information Center at (800) 858-7378 or the Michigan Department of Agriculture and Rural Development (800) 292-3939. Information may also be found on the web at www.npic.orst.edu

Sincerely,
